

Aster "Callisthephus"

ASTER
"Daylight Violet"

ASTER
"Daylight Red"

ASTER
"Kurenai Red"

Cultural Recommendations:

Plant Size:

Aster Daylight: 28 to 32 inches height

Aster Kurenai: 24 to 28 inches height

Seasonal Application

Sowing: Aster Daylight: 28 to 32 inches height

Finishing: Aster Daylight: 28 to 32 inches height

Photoperiodism: Photoperiodism of 16 hours necessary to keep plant vegetative to build plant size before flower initiation

Seedling Stage

Tray: 200 to 288 cell

Germination: Emergence 4 -5 days | 18.3 - 21°C

Supplemental Lighting: Night interruption of 4 hours necessary to prevent premature flowering

Seedling Finish Time: 4 - 6 weeks

Finishing/ Flowering Stage

Transplanting: 30 - 40 days

Spacing: 4 inches x 4 inches

Days to Flower from Sowing: 120 to 170 days

Temperature: 18.3 - 21°C

Notes

With preservatives, cut flowers should last 10 to 14 days

For daylight series, do not replant in the same area for 5 to 6 days unless fumigating
