

# Cosmos “Sea Shells Mix”

**Cosmos**  
Sea Shells Mixture

## Planting Guide:

**Life Cycle:** Annual

**Family:** Asteraceae Family

**Market Use:** Cut flower, cut foliage, landscaping

**Plant Height:** 120 - 47cm

**Height Category:** Tall

**Day to Flower:** 8 - 10 days

**Planting Method:** Direct Sowing

**Days of Germination:** 2 - 7 days

**Light Requirement:** Sun/Partial Shade

## Planting Instructions:

1. Sow your Cosmos seeds in the full sun to partial shade.
2. As cosmos flowers are very adaptable, they can thrive in average to poor soil quality, and they are tolerant to dry conditions.
3. Seeds can be covered  $\frac{1}{4}$  inch since they do not need light to germinate.
4. Germination will usually occur in just 2 to 7 days, but it can take up to 2 weeks.
