

# Morning Glory

**Morning Glory**  
"Cameo Elegance"

## Colors:

Flower is rose-red with white throat, variegated foliage

## Size/Plant Habit:

Trumpet shape flowers, 1¼" to 1¾" diameter

Climbing plant, 6 to 9 feet height, blooms prolifically under short days condition

## Characteristics:

Easy to grow, variegated foliage, blooms profusely under short day conditions

## Market Use:

Trailing pot plant, trellised pot plant, landscape, hanging basket, climbing vine

## Cultural Recommendations:

**Sowing:** Direct sowing is recommended

**Container to be used:** Hanging basket, container with trellis, pots for direct planting in landscape

**Germination:** 4 - 5 days / 19 - 25°F; cover the seeds

**Days to Flower from Sowing:** 65 to 80 days

**Temperature:** 21 to 26°C

**ph Level:** 6.0 to 6.4

**Planting Distance:** 6 x 6 inches, place on sunny location

## Notes:

- Prefers low fertility soil and warm, dry conditions
- Typically sown direct to final containers since plants establish well and tend to be stressed during transplanting (peat pots are a good option)
- Easy to sow direct in garden, makes a good packet seed item
- Provide a trellis or other method for them to climb, otherwise they will form a mat-like mound
- Plant habit is affected by temperature with warm temperatures inducing vegetative growth, and cool temperatures (short days) induce flowering
